

VINCE KENNETH L. OLEMBERIO

Junior Full Stack Developer | Web, Database & IOT

0961-418-3186 | vince.olemberio2004@gmail.com | Manolo Fortich, Bukidnon, Philippines

Portfolio: vinceolemberio.vercel.app | Github: github.com/Lord-binns

PROFESSIONAL SUMMARY

Motivated Junior Full-Stack Web Developer with experience in frontend and backend development, databases, and software development, with additional experience in IoT and IT support. Skilled in building web applications, working with SQL databases, developing practical software solutions, and troubleshooting technical issues.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, C, C++, PHP, HTML
- **Frameworks & Libraries:** React, Laravel, Vite, Node.js, Express.js, FastAPI, Tailwind CSS, Bootstrap, Arduino
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL, Firebase, Supabase,
- **Tools & Platforms:** Git, GitHub, Visual Studio Code, Vercel, Render, FileZilla, Figma
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management, REST API Development, Web Development, IoT Development, Software Testing, System Troubleshooting, System Integration, Version Control, Technical Support

PROFESSIONAL EXPERIENCE

Full-stack Developer & IT Support - Intern | Public Employment and Services Office (PESO) March 2026 – June 2026

- Developed a full-stack web-based PESO Job Portal System to support job postings, applications, employer profiles, and other employment-related services.
- Provided IT support and technical assistance to PESO staff and clients, including assisting users with office systems and services.
- Performed printer maintenance and troubleshooting, including basic setup, configuration, and resolving printing-related issues.
- Created and edited digital documents, reports, and office files to support daily administrative operations.

PROJECTS

PESO Management and Job Portal System | 2025–2026

Public Employment Services Office (PESO), Manolo Fortich, Bukidnon

- Developed an integrated web-based PESO system for managing job postings, applications, employer profiles, clearance requests, and other employment-related services.
- Implemented administrative functions and database-driven workflows to streamline office processes and improve the management of PESO services.
- Technologies: PHP, Laravel, MySQL, JavaScript, HTML, CSS, Bootstrap, Render, Git/GitHub

Aquaguard: A Solar-powered IOT based water quality monitoring system for early signs of pollution on the Mangima river | 2025-2026

Capstone Project (Defended) - Municipal Environment and Natural Resources Office, Manolo Fotich, Bukidnon

- Developed a solar-powered IoT water quality monitoring system that measures pH, turbidity, TDS, and temperature for early detection of potential water pollution.
- Implemented LoRa wireless communication to transmit sensor data and developed a web-based dashboard for viewing and tracking water quality.
- Technologies: Microcontrollers Arduino (Mega), Esp32, LoRa, pH Sensor, Turbidity Sensor, TDS Sensor, Temperature Sensor, PHP, JavaScript, MySQL, HTML, CSS,

EnviroTrack: Environmental Incident Mapping System

- Developed an environmental incident mapping system that enables users to report environmental violations and disasters, provide incident details, and pinpoint affected locations using map coordinates.
- Implemented GIS-based interactive mapping using Leaflet.js to display reported environmental incidents as location-based markers for easier visualization and monitoring.
- Technologies: Laravel, PHP, MySQL, JavaScript, HTML, CSS, Leaflet.js, Render, Git/GitHub.

EDUCATION

Bachelor of Science in Information Technology 2022-2026

Northern Bukidnon State College

- Deans Lister
